

## Port Bulletin

### FROM THE PRESIDENT

Hello to all of our Port Residents. Well needless to say this has been a hard winter at the Port. In January we had three major storms pound the Port . Unfortunately, some of our Residents suffered some damage to their Chesapeake rooms, sheds and trailers. The good news is ,if it can be called good news was that none of the damage was severe. Still it is never easy when a Board Member has to call a Resident and tell them they have damage to their property. This winter has also been a sad time at the Port we've learned that one of the sons of Randy & Sue Huber, Grant Huber lost his life in Thailand. Needless to say that our thoughts and prayers go out to Randy, Sue and their son Phillip, his wife and step daughter at the loss of their loved one. All in all Spring is fast approaching and with that comes the hopes and thoughts of another warm and beautiful season at Port Delmarva. We will need all the help we can get for spring clean up on April 9th , trust me when I say there is a lot of clean up to be done. In closing, I would like to thank all of my fellow Board Members for all their help this winter, and to the Residents who came down to the Port and let us know of things out of order. Looking forward to seeing you all this season at the Port.

Sincerely,  
George Carter  
PMV Port President

### REMINDER!

**The Board of Directors asks that Port Residents DO NOT place any items behind the Pole Barn garage and Pump House buildings.**

**It is not a dumping site.**

**The only items allowed to be placed there are PVC piping for sewer connection.**

### RV BATTERIES

Battery condition is dependent on how well the batteries were cared for during winter storage. When batteries are in storage, they lose a percentage of current through internal leakage. A battery can discharge up to 10% a month when it is in storage. If you checked and recharged the batteries while in storage, they should be ready to go. If not, the first step is to fully charge the batteries. Water should only be added to lead acid batteries after fully charging the battery unless the water level is already below the plates. The plates need to be covered at all times. After the battery is fully charged, check and add distilled water as required. If the batteries were removed for storage, reinstall them making absolutely sure they are connected properly.

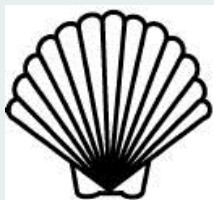

**Caution:** If you are not comfortable working on or around batteries, have the maintenance done by an authorized RV repair facility.

### RV TIRES

Just like the battery loses a percentage of its charge in storage, tires lose a percentage of air pressure in storage. Your tires can lose 2-3 psi a month while sitting in storage. Check the tire pressure using a quality tire inflation gauge and adjust the inflation pressure to the manufacturer's recommendation based on the load.

2 **Note:** Tire manufacturers publish load and inflation tables for proper inflation pressure.
